

United Nations Statistical Commission

Fifty-third session

Item 3 (g) of the provisional agenda

Items for discussion and decision: human settlements statistics

Document E/CN.3/2022/11 – Report of United Nations Human Settlements

Programme on human settlements statistics

<i>Statement provided by:</i> BPS - Statistics Indonesia	
<i>Statement:</i> Indonesia acknowledges all the achievements, including the ongoing work of UN-Habitat on the development of human settlement statistics and is looking forward to work closely with UN-Habitat and other agencies/fellow Member Countries in its implementation. Indonesia would also emphasize the importance of sustainable capacity-building activities as part of the strategy to develop an efficient and harmonized global-wide human settlement statistics. BPS-Statistics Indonesia has been continuously produced human settlement statistics as stated in SDGs goal 6 and 11. Nevertheless, technical assistance is required in order to develop a methodology that not only is reliable for estimation in smaller level but also responsive to disruption such as the Covid-19 pandemic.
