Statement provided by:

Statistics Poland

Statement:

Poland approves the Road Map on crime statistics presented in the report.

In Poland, the Ministry of Justice coordinates the process of implementation of the international classification of crimes for statistical purposes (ICCS) into the Polish official statistical system. In January 2019, an interdepartmental Team in this area was created, which gathered representatives of crime statistics producers in Poland - Ministry of Justice, Prosecutor's Office, Police, Border Guard, Military Police, Prison Service, and employees of the Institute of Justice and Statistics Poland. Establishing the Team fulfilled a milestone defined by UNODC in implementing the classification in the Member States. By mid-2023, it is planned to complete works related to mapping Polish criminal regulations to individual categories of ICCS classification.

Poland fully supports all UNODC initiatives to strengthen the role of the SDG16 survey tool in obtaining and using statistical data for SDGs and providing information on new crimes.
