Statement provided by:
Mexico-INEGI

Statement:
Mexico prepares comparative and equivalence tables between ISCED-2011 and the classification of training fields (Mexican Classification of Study Programs, CMPE) with which it contributes to the process of standardizing information on educational levels.

Mexico has participated in presenting various reports required by international data organizations on education using the ISCED-2011.

Mexico recognizes the need to undertake actions to improve data availability and develop methodologies to produce thematic indicators for the follow-up of Sustainable Development Goal 4.

Mexico shares the view on the potential of the benchmarking approach to identify conceptual and methodological gaps in data collection and presentation and undertake actions to collect data that will lead to relevant education statistics.
