Statement provided by:
National Statistical Committee of the Kyrgyz Republic

Statement:
National Statistical Committee of the Kyrgyz Republic welcomes the report of the Secretary-General on the adoption of the global set of climate change statistics and indicators as the framework for climate change statistics and indicators and encourages the action plan prepared by the UN Statistics Division for its further implementation.

Taking into account the increased data requirements for the implementation of the Paris Agreement, we recognize the importance of strengthening the link between statistics and programs on the climate agenda at the national and international levels.

Kyrgyz Republic works on expansion of the national set of climate change indicators and ready to share its experience. We would like to ask the methodological support to continue the development of the national set of climate change indicators.
