Statement:
Revising the National Statistical Accounts System and connecting it to all source internal NSO and other governmental bodies to reach national account integrated system
National Accounts Development Project in Jordan

The Department of Statistics of Jordan in cooperation with the ESCWA is implementing the National Accounts Statistics Development Project which aims to build capacity to establish a sustainable system of national accounts in the DOS to ensure the continuity of the production of national accounts statistics in accordance with international best practices and their ability to keep up with developments in international methodologies and guidelines. The main reasons for this project are the consistency of the time series and the annual and quarterly estimates of GDP with the macroeconomic indicators calculated in other ways, and the upgrading of specialized technical staff. The project will be implemented in four years (2022-2025) in four phases, and a permanent expert, as well as several experts, has been engaged throughout the project
