

United Nations Statistical Commission

Fifty-third session

Item 3 (q) of the provisional agenda

Items for discussion and decision: information and communications technology statistics

Document E/CN.3/2022/21 – Report of the Partnership on Measuring Information and Communication Technologies for Development

<i>Statement provided by:</i> Mr. Batdavaa Batmunkh Chairman National Statistics Office of Mongolia	
<i>Statement:</i> The NSO Mongolia welcomes the report of the Partnership on Measuring Information and Communication Technology for Development. We endorse the adoption of the revised core list of indicators. Our country has expeditiously implemented and adhered to the new guidelines and methods, adopted by the Partnership. We encourage the collection of e-waste data. In addition, our country is looking into opportunities to develop new e-waste indicators and methodology, and to seek input from the Partnership on Measuring Information and Communication Technology for Development (ICP). There is a need to organize events to share the good experience of other countries on how to address the legal issues faced by enterprises in data processing using big data.
