

**United Nations Statistical Commission**

**Fifty-third session**

Item 3 (q) of the provisional agenda

**Items for discussion and decision: information and communications technology statistics**

**Document E/CN.3/2022/21 – Report of the Partnership on Measuring Information and Communication Technologies for Development**

<i>Statement provided by:</i> Statistical Office of the Republic of Slovenia	
<i>Statement:</i> Statistical Office of the Republic of Slovenia endorses the revised core of ICT indicators. We welcome and support methodological work on the usage of Big data for measuring digitalization of the society and economy. However, we must not forget that the emphasis should also be on non-ICT users. This data are needed for implementation of policies that will accelerate their inclusion in the digital age.
