

**United Nations Statistical Commission**

**Fifty-third session**

Item 3 (s) of the provisional agenda

**Items for discussion and decision: agricultural and rural statistics**

**Document E/CN.3/2022/23 – Report of the Food and Agriculture Organization of the United Nations on agricultural and rural statistics**

<i>Statement provided by:</i> Chile	
<i>Statement:</i> Chile is pleased with the close relationship it has maintained over the years with the regional FAO office, which has provided support and consultancy for the monitoring of SDG indicators related to its scope of action and thus has permitted us to advance in the follow-up and monitoring of indicators of the 2030 Agenda and to create the requisite capacities in the country to report on them.  We appreciate the support provided by the FAO through various meetings on methodologies related to the world census program. This support was fundamental in the development of the VIII National Agricultural and Forestry Census conducted in Chile in 2021 during the pandemic. Finally, it should be noted that, together with the Ministry of Agriculture, the FAO regional statistician has been consulted on the design and planning of the next intercensal cycle, including the design of a survey system adapted to national circumstances, which is currently in the evaluation stage.
