Statement provided by:
The Netherlands

Statement:
The Netherlands welcomes the Report of the Committee of Experts on International Statistical Classification and appreciates the work that is done by the TT-ISIC on the new International Standard Industrial Classification (ISIC).

The Netherlands suggest an adoption of the ISIC structure by a written procedure in the weeks after the UNSC meeting, in order for the feedback provided in the consultation to be taken into account (after an analysis and evaluation).

The Netherlands approves the Classification of Business Functions for use in international statistics, and supports initiating of the revision of the Standard International Energy Product Classification.
