

**United Nations Statistical Commission**

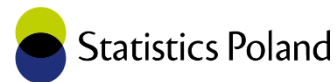

**Fifty-third session**

Item 3 (v) of the provisional agenda

**Items for discussion and decision: international statistical classifications**

**Document E/CN.3/2022/26 – Report of the Committee of Experts on International Statistical Classifications**

*Statement provided by:*

*Statement:*

Statistics Poland endorses the draft revised structure for the International Standard Industrial Classification of All Economic Activities (ISIC) Rev 4 and the Classification of Business Functions as an international standard classification.

Statistics Poland supports the initiation of the revision of the Standard International Energy Product Classification.

We support the Expert Group to expand its areas of interest to broader statistical classification matters and to work on new and innovative approaches for the development and maintenance of international statistical classifications to rationalize and reduce the time and cost associated with the cyclical review process.
