United Nations Statistical Commission
Fifty-third session
Item 3 (x) of the provisional agenda
Items for discussion and decision: integration of statistical and geospatial information

Document E/CN.3/2022/28 Report of the Expert Group on the Integration of
Statistical and Geospatial Information

Statement provided by:
Central Agency for Public Mobilization and Statistics (CAPMAS)
Arab Republic of Egypt

Statement:
• Egypt thanks the experts Group for the effort made in the global report and survey and supports this progress made regarding the extent of readiness for the implementation of the Global Framework for Geospatial Statistical Information and its action plan for 2022-2024.

• We also point out that the statistical and demographic data related to Egypt Census -2017 have been integrated at the level of the administrative boundary, grid, and building, Spatial analyzes were done on this data to extract all the social and economic characteristics of the population. Integration of statistical and geospatial information, and the attendance of the 11th meeting of the United Nations expert committee for the management of geospatial information, and (3) workshops were held through the Arab Committee by the work team for the integration of geospatial and statistical information in the agency.. as follows:

1. Presenting Egypt's experience in the 2017 census in the context of transferring the experiences of countries in the 2020 census cycle.

2. Clarify how spatial information is used in achieving sustainable development indicators -

3. Demonstrate the use of big data as a tool in topics concerned with the integration of statistical information.
