United Nations Statistical Commission
Fifty-third session
Item 3 (x) of the provisional agenda
Items for discussion and decision: integration of statistical and geospatial information

Document E/CN.3/2022/28 – Report of the Expert Group on the Integration of Statistical and Geospatial Information

Statement provided by: SWEDEN
Statement:
Sweden highly appreciates the work done by the Expert Group and recognises the importance of its role to continuously elaborate and provide guidance on statistical-geospatial data integration. It is our view that the proposed workplan for 2022-2024 reflects the priorities of the Member States in accordance with the responses to the Global Survey. Sweden particularly welcomes the increased focus on the coordinating role of the Expert Group and its efforts to strengthen interlinkages with relevant groups in both the statistical and geospatial communities. In line with this ambition, Sweden urges the Expert Group to strengthen its collaboration with the regional committees, regional commissions of the United Nations and other relevant regional stakeholders.
