

United Nations Statistical Commission

Fifty-third session

Information items 4(a) – 4(i)

<i>Statement provided by:</i> PHILIPPINES Philippine Statistics Authority	
<i>Agenda item</i>	Item 4(a) Ageing-related statistics and age-disaggregated data (E/CN.3/2022/30)
<i>Statement:</i> <p>The Philippines recognizes the effort of the group to support the 2030 Agenda for Sustainable Development through its work on developing international guidance and methods on the production of ageing-related statistics and age-disaggregated data. It is worth noting that despite the setbacks due to the pandemic, the group was still able to make good progress by utilizing its resources in priority areas.</p> <p>The Philippines also applauds the Titchfield Group for keeping its momentum through the conduct of regular discussions; revisiting the objectives of the work strands; and starting work on the publication, A Global Sustainable Development Goals Indicator Framework: Making Older People Visible. We look forward to the completion of the report and the knowledge-sharing platform that will help us address data gaps on SDGs related to ageing.</p> <p>While a lot of things remain to be done, we are optimistic that the group will continue to deliver remarkable outputs and will continue to achieve what it has set out to do.</p>
