Advancing methods to close important gender data gaps including on unpaid work and femicides

Side Event to the 53rd session of the United Nations Statistical Commission

17 February 2022 (Thu) – 08:00-09:15 am, NY time

Introduction
Francesca Grum, UNSD

Part I
Innovative and effective ways to collect time-use data
Lisa Scanlon, Australian Bureau of Statistics
Patricia Houle, Statistics Canada
Will King, Office for National Statistics, UK
Q&A

Part II
Statistical framework for measuring the gender-related killings of women and girls (femicide/feminicide)
Enrico Bisogno, UNODC
Q&A

Part III
Minimum Set of Gender Indicators – New Data Portal
Lingyan Hu, UNSD
Luis Gerardo Gonzalez Morales, UNSD

Click here to join the meeting

The side event will present the three reports finalized by the UN Expert Group on Innovative and Effective Ways to Collect Time-Use Statistics: (a) the Minimum Harmonized Instrument for the production of time-use statistics; (b) digitalization / modernization of time use data collections; and (c) quality considerations for time-use surveys. These reports will be discussed at the 53rd session of the Statistical Commission, under agenda item 3(h) (https://unstats.un.org/unsd/statcom/53rd-session/documents/) and will serve as the basis for updating the UN Guide to Producing Statistics on Time Use: Measuring Paid and Unpaid Work.

The side event will also introduce the key elements of the statistical framework for measuring the gender-related killings of women and girls (also referred to as “femicide/feminicide”), to be discussed under agenda item 3(j) (https://unstats.un.org/unsd/statcom/53rd-session/documents/).

Finally, Member States will have the opportunity to discuss the above technical materials with the panelists and have their questions answered; and be introduced to the redesigned data portal for the UN Minimum Set of Gender Indicators.
