The GSGF at the Regional Level Latin America and the Caribbean

NACIONES UNIDAS UNITED NATIONS

Geospatial Information for Sustainable Development UNSC Side Event February 2022

UNITED NATIONS

CEPAL

Development Account 13

Geospatial specific objective

Increased national capacities to **integrate geospatial** and **statistical** data, through the adoption of regional and **global frameworks, standards and methodologies**

Target countries

- Argentina
- Costa Rica
- Dominican Republic
- Ecuador
- Guatemala
- Paraguay

36 months (June 2021 – June 2024)

Development Account 13 Baseline established by EG-ISGI's 'Global Survey to diagnose readiness at the country level for Visión general implementing the GSGF' Responses received in both English and Spanish estadístico-geoespacial

Institutional framework and governance Geospatial information and standards

Confidentiality and privacy

Outcomes

for each country

Capacity building for the implementation of the Global Geospatial Statistical Framework (GSGF), and other standards and methodologies that facilitate integration and interoperability

Adoption of geocoding methodologies

Use of common geographies

Implementation of policies, standards, good practices and technologies that will support access to geostatistical data

Capacity building for the implementation of the **Global Geospatial Statistical Framework** (GSGF), and other standards and methodologies that facilitate integration and interoperability

Outcomes

for each country

National agreement between NSO-NGIA and other actors involved to implement a national geostatistical framework

Roadmap that describes the actions to integrate statistical and geospatial information

Pilot geospatial platform to show the geostatistical integration disaggregated and linked to the COVID-19 variables

High level conference on the importance of global frameworks and the importance of geographic information for informed decision-making
