# Annex 1: Classification and coding structure of accounting entries

### A. Introduction

- A1.1 The coding structure of the entries in the accounts of the System serves two purposes. Codes are the means whereby information can be identified, stored within and retrieved from a database. A code also indicates the nature of a stock or flow and its place within the classification hierarchy. The codes used in the System use up to seven positions. The first is a letter indicating what family of codes a particular code belongs to. This is followed by up to six further positions, usually numeric. In general the codes are purely hierarchical with more digits being used to indicate progressively finer subdivisions of a high-level code. For example, code D5211 indicates that this is a distributive transaction (D), in particular a current transfer (D5), part of net social contributions (D52), is a payment by the employer (D521) and that it relates to pensions (D5211). In this case, trailing zeros can be treated as blanks and omitted. For the sector codes, while trailing zeroes may still be omitted, there are also embedded zeroes that cannot be omitted. This is because all seven positions are used in order to allow cross-classification according to different criteria, as explained in the section on sector codes.
- A1.2 Current account flows consist of a single code. Entries relating to accumulation usually have two parts, the first showing the sort of flow or other entry and the second showing the type of asset or liability involved. For example P51g relates to all gross capital formation, P51gAN111 relates to gross capital formation in dwellings. This device can also be used to show more detail on products, if desired as explained in section C.
- A1.3 The entries in the accounts are divided into types designated by one or two letters as follows:
  - a. S codes relating to sectors,
  - b. P codes relating to transactions in products
  - c. NP codes relating to transactions in non-produced assets
  - d. D codes relating to distributive transactions
  - e. F codes relating to transactions in financial assets and liabilities
  - f. K codes relating to other changes (non-transactions) in assets
  - g. B codes relating to balancing and net worth items,
  - h. L codes relating to balance sheet entries
  - i. AN codes relating to non-financial assets (both produced and non-produced),
  - j. AF codes relating to stocks of financial assets and liabilities.

Each of these is described in turn in the following sections.

- A1.4 Some abbreviations, standard within the System, are used in detailing sector codes. A special group of units are those known as non-profit institutions, designated as NPIs. Within the corporations sectors, units that are not NPIs are referred to as for profit institutions, or FPIs. It is worth reiterating that an NPI is not prohibited from making a profit, it is simply prohibited from distributing any profit it makes to its owners. Thus NPIs within the corporations sectors are market producers just as the FPIs are.
- A1.5 Not all NPIs are market producers. Those that are not are divided between those controlled by government, where they are still referred to as NPIS and those not controlled by government. All of these serve households and form a separate sector of their own. They are known as non-profit institutions serving households, or NPISHs.

#### 1. Other coding systems

A1.6 Within section C of this annex and throughout the text, reference is made to other international classifications schemes. The full publication reference of each and the web address where details of the classifications may be found follows.

#### COFOG, COICOP and COPNI

Publication reference: United Nations. 2000. Classification of expenditure according to purpose: Classification of the functions of government (COFOG), Classification of individual consumption according to purpose (COICOP), Classifications of the Purposes of non-profit institutions serving households (COPNI), Classification of the outlays of producers according to purpose (COPP). Department of Economic and Social Affairs, Statistics Division, Statistical papers, Series M, No 84. United Nations, New York.

Web reference: http://unstats.un.org/unsd/class/default.asp

#### ISIC

Publication reference: United Nations. 20XX. International Standard Industrial Classification of all Economic Activities (ISIC) Revision 4. Department of Economic and Social Affairs, Statistics Division, Statistical papers, Series M, No 4, Rev. 4. United Nations, New York.

Web reference: http://unstats.un.org/unsd/class/default.asp

#### **CPC**

Publication reference: United Nations. 20XX. Central Product Classification (CPC) Version 2. Department of Economic and Social Affairs, Statistics Division, Statistical papers, Series M, No 77, Ver. 2. United Nations, New York.

Web reference: http://unstats.un.org/unsd/class/default.asp

#### SITC

Publication reference: United Nations. 2006. Standard Industrial Trade Classification Revision. Department of Economic and Social Affairs, Statistics Division, Statistical papers, Series M, No 34, Rev 4. United Nations, New York.

# B. Sector codes (S)

- A1.7 Sector codes consist of up to seven positions. The first of these is S, indicating these are sector codes. The second position is either 1 for the total economy or 2 for the rest of the world. These two positions always exist. Since trailing zeroes, here and for all codes, may be omitted, S1 indicates the total [domestic] economy.
- A1.8 The third position indicates the main sector of the total economy; 1 is non-financial corporations, 2 is financial corporations, 3 is general government, 4 is households and 5 is NPISHs. The fourth position is particular to each of the sectors. The fifth position is used only for general government and shows, for each level of government, social security funds at that level and other units at that level of government. This use of two positions within the general government codes allows the alternative structuring of sub-sectors of general government to be accommodated within a single consistent coding scheme.

- A1.9 The sixth position indicated whether units are public (1), national private (2) or foreign controlled (3). By inserting embedded zeros for positions two to five, all units belonging to these classes can be referenced across all sectors. Similarly the seventh position indicates whether the unit is an NPI or an FPI and embedding zeroes for positions two to six will reference all units of one class or the other across the total economy.
- A1.10 The full list of sector codes is shown below.

Total economy

# C. Product codes (P)

Rest of the world

S2

A1.11 Product codes are used to describe the supply and use of goods and services produced within the System. They can be further elaborated by applying a second classification to that shown here. For capital formation the asset classification (codes AN1 shown in section J) are used within the accumulation accounts. For output, intermediate consumption and final consumption product codes as in the CPC could be used. For final consumption, functional codes could be used, COFOG for government consumption, COICOP for households and COPNI for NPISHs. For imports and exports, either SITC or HS codes could be used or the functional codes of BPM6.

- A1.12 Capital formation and fixed capital formation (as well as some of the balancing items shown in section H) may be shown either gross or net of consumption of fixed capital. Gross entries as shown with a trailing g, net entries by a trailing n.
- A1.13 The full list of product codes is shown below.

<b>P1</b> P11 P12 P13	Output  Market output Output for own final use Non-market output
P2	Intermediate consumption
<b>P3</b> P31 P32	Final consumption expenditure Individual consumption expenditure Collective consumption expenditure
<b>P4</b> P41 P42	Actual final consumption  Actual individual consumption  Actual collective consumption
P5 P51n P51g P511 P5111 P5112 P5113 P512 P52 P53	Capital formation  Net fixed capital formation Gross fixed capital formation  Acquisitions less disposals of fixed assets Acquisitions of new fixed assets Acquisitions of existing fixed assets Disposals of existing fixed assets Costs of ownership transfer on non-produced assets Changes in inventories Acquisitions less disposals of valuables
<b>P6</b> P61 P62	Consumption of fixed capital (-)  Consumption of fixed capital on gross operating surplus (-)  Consumption of fixed capital on gross mixed income (-)
<b>P7</b> P71 P72	Exports of goods and services Exports of goods Exports of services
<b>P8</b> P81 P82	Imports of goods and services Imports of goods Imports of services

# D. Transactions in non-produced assets (NP)

A1.14 The codes used for transactions in non-produced non-financial assets can be further disaggregated if desired by appending the classification of non-produced non-financial assets, AN2, shown in section J.

NP	Acquisitions less disposals of non-produced assets
NP1	Acquisitions less disposals of natural resources
NP2	Acquisitions less disposals of contracts, leases and licences
NP3	Purchases less sales of goodwill and marketing assets

# E. Distributive transaction codes (D)

- A1.15 Distributive transaction codes appear in all of the sequence of accounts from the generation of income account up to and including the capital account. As their name implies, they show the impact of distribution and redistribution of income (and saving in the case of capital transfers). For every D code (except D21, taxes on products), the receivable entries for all sectors including the rest of the world must balance the payable entries.
- A1.16 There are five groups of distributive transaction entries that impact the accounts leading to the derivation of disposable income. These are compensation of employees (D1), taxes on production and imports (D2), subsidies (D3), property income (D4) and current transfers in cash (D5). Current transfers in cash cover a multitude of items and these too are divided into four main subsections, current taxes on income, wealth etc., (D51), net social contributions (D52), social benefits other than social transfers in kind (D53) and other current transfers (D54). In addition to these current transfers in cash, social transfers in kind are coded as D6.
- A1.17 An uncoded item, investment income, is shown under property income. It is equal to all property income less rent. It is included to facilitate harmonisation with BPM6 terminology. Rent is only payable to resident units and so does not appear in the BPM. The term investment income is thus used in BPM6 in place of property income.
- A1.18 Another uncoded item appears under net social contributions. Employers' contributions appear in several accounts and it is more intuitive to show these with exactly the same value in each case even though when they are paid to social insurance schemes, a charge is deducted that represents part of the output of the schemes and final consumption of the beneficiary households. The item social insurance scheme service charges is thus an adjustment item only and not a distributive transaction in itself.
- A1.19 By convention, as explained in chapter 10, all capital transfers are shown on the left-hand side of the account, with the receivables having a negative sign. The codes for capital transfers, therefore, have either r for receivable or p for payable appended to the basic code.
- A1.20 The full list of distributive transaction codes is shown below.

D1	Compensation of employees
D11	Wages and salaries
D12	Employers' social contributions
D121	Employers' actual social contributions
D1211	Employers' actual pension contributions
D1212	Employers' actual non-pension contributions
D122	Employers' imputed social contributions
D1221	Employers' imputed pension contributions
D1222	Employers' imputed non-pension contributions
D2	Taxes on production and imports
D21	Taxes on products
D211	Value added type taxes (VAT)
D212	Taxes and duties on imports excluding VAT
D2121	Import duties
D2122	Taxes on imports excluding VAT and duties
D213	Export taxes
D214	Taxes on products except VAT, import and export taxes
D29	Other taxes on production
D3	Subsidies
D31	Subsidies on products
D311	Import subsidies
D312	Export subsidies
D319	Other subsidies on products
D39	Other subsidies on production
D4	Property income
	Investment income
D41	Interest
D42	Distributed income of corporations
D421	Dividends

D422 D43 D44 D441 D442 D443 D45	Withdrawals from income of quasi-corporations Reinvested earnings on direct foreign investment Investment income disbursements Property income attributed to insurance policy holders Payable on pension entitlements Attributed to collective investment fund share holders Rent
D5	Current transfers in cash
<b>D51</b> D511 D519	Current taxes on income, wealth, etc.  Taxes on income Other current taxes
D52 D521 D5211 D5212 D522 D5221 D5222 D523 D5231 D5232 D5232 D524 D5241 D5242	Net social contributions  Employers' actual social contributions  Employers' actual pension contributions  Employers' imputed social contributions  Employers' imputed pension contributions  Employers' imputed pension contributions  Employers' imputed non-pension contributions  Household actual social contributions  Household actual pension contributions  Household actual non-pension contributions  Household social contribution supplements  Household pension contribution supplements  Household non-pension contribution supplements  Social insurance scheme service charges(-)
D53 D531 D5311 D5312 D532 D5321 D5322 D533	Social benefits other than social transfers in kind Social security benefits in cash Social security pension benefits Social security non-pension benefits in cash Other social insurance benefits Other social insurance pension benefits Other social insurance non-pension benefits Social assistance benefits in cash
D54 D541 D5411 D5412 D542 D5421 D5422 D543 D544 D545 D5451 D5452 D5459	Other current transfers  Net non-life insurance premiums  Net non-life direct insurance premiums  Net non-life re-insurance premiums  Non-life insurance claims  Net non-life direct insurance claims  Net non-life re-insurance claims  Current transfers within general government  Current international cooperation  Miscellaneous current transfers  Current transfers to NPISHs  Current transfers between resident and non-resident households  Other miscellaneous current transfers
<b>D6</b> D61 D62	Social transfers in kind  Social transfers in kind - government non-market production  Social transfers in kind - market production purchased by government
D7	Change in pension entitlements

D8r	Capital transfers, receivable
D81r	Capital taxes
D82r	Investment grants
D89r	Other capital transfers
D8p	Capital transfers, payable
D81p	Capital taxes
D82p	Investment grants
D89p	Other capital transfers

### F. Transactions in financial assets and liabilities (F)

- A1.21 The codes for transactions in financial assets and liabilities follow a slightly different pattern from those used for non-financial assets because there is only one type of transaction shown in the financial account, either acquisition of or disposals of financial assets and liabilities. The hierarchical element comes from itemising the assets and liabilities concerned. There is a perfect match between the codes used for stock levels (positions) of financial assets and liabilities and the flows in them, except that the stocks have prefix AF and the transactions F.
- A1.22 The full list of codes for transactions in financial assets and liabilities is shown below.

#### F Net acquisition of financial assets/Net incurrence of liabilities F1 Monetary gold and SDRs F11 Monetary gold F12 **SDRs** F2 **Currency and deposits** F21 Currency Transferable deposits F22 F221 Inter-bank positions F229 Other transferable deposits F29 Other deposits F3 **Debt securities** F31 Short-term F32 Long-term F4 Loans F41 Short-term F42 Long-term F5 Equity and investment fund shares F51 Equity F511 Listed shares F512 Unlisted shares F519 Other equity F52 Investment fund shares/units F521 Money market fund shares/units F529 Other investment fund shares/units F6 Insurance, pension and standardised guarantee schemes Non-life insurance technical provisions F61 Life insurance and annuity entitlements F62 Pension entitlements F63 Claims of pension funds on sponsors F64

Entitlements to non-pension benefits

F65

F66 Provisions for calls under standardised guarantees F7 Financial derivatives and employee stock options Financial derivatives F71 F711 Options F712 Forwards F72 Employee stock options F8 Other accounts receivable/payable Trade credits and advances F81 F89 Other accounts receivable/payable

# G. Other flows (K)

A1.23 Codes K1 to K6 relate to other flows in the changes in the volume of assets account. K7 codes show the holding gains and losses appearing in the revaluation account. The full list of codes for other flows is shown below.

K1	Economic appearance of assets
K2	Economic disappearance of non-produced assets
K21	Depletion of natural resources
K22	Other economic disappearance of non-produced assets
K3	Catastrophic losses
K4	Uncompensated seizures
K5	Other changes in volume n.e.c.
K6	Changes in classification
K61	Changes in sector classification and structure
K62	Changes in classification of assets and liabilities
K7	Nominal holding gains and losses
K71	Neutral holding gains and losses
K72	Real holding gains and losses

# H. Balancing and net worth items (B)

- A1.24 The balancing items of the current accounts appear as codes B1 to B8. Each of these may be shown gross or net of consumption of fixed capital. To indicate which is the case, g or n is appended to the end of the code.
- A1.25 The B10 codes all relate to changes in net worth. Like balancing items, these are accounting constructs derived by deducting entries on one side of the account from the entries on the other. However, while balancing items show the excess of left-hand side entries over those on the right-hand side, net worth items show the excess of entries on the right-hand side of the account over those on the left-hand side.
- A1.26 Code B11, external balance of goods and services, is an item from the rest of the world account. It has no direct counterpart in the total economy sectors but added to gross (or net) value added for the total economy gives gross (or net) domestic product. Code B12, current external balance, is also from the rest of the world account and is analogous to saving for a domestic sector when the external balance of goods and services is taken in place of value added.
- A1.27 Code B90, unlike all the other codes in this section, relates to stock positions and not flows. It shows the value of net worth calculated as the excess of assets over liabilities.
- A1.28 Codes B10 and B90 are the only two codes in the System where a trailing zero cannot be omitted.
- A1.29 The full list of balancing and net worth items is shown below.

B1q Value added, gross / Gross domestic product B2a Operating surplus, gross B3g Mixed income, gross B4q Entrepreneurial income B5q Balance of primary incomes, gross / National income, gross B6g Disposable income, gross B7q Adjusted disposable income, gross B8g Saving, gross B9 Net lending (+) / net borrowing (-) B10 Changes in net worth B101 Changes in net worth due to saving and capital transfers B102 Changes in net worth due to other changes in volume of assets B103 Changes in net worth due to nominal holding gains and losses B1031 Changes in net worth due to neutral holding gains and losses B1032 Changes in net worth due to real holding gains and losses B11 External balance of goods and services B12 Current external balance B90 Net worth

#### I. Balance sheet entries

- A1.30 For a single balance sheet, as for the financial account, the only codes necessary are those giving the details of assets by type, using AN and AF codes. However, an account can be drawn up showing the stock levels at the start (LS) and end (LE) of a period, and the total changes between them (LX). All three codes need to be qualified by asset types. The LX entries are the sum of the entries of P5, F and K codes for the assets in question for the period covered.
- A1.31 From the entries in the opening balance sheet a value of net worth (B90) can be calculated. The difference between this and the value of B90 in the closing balance sheet must be equal to the balance of all the LX codes, which must also be equal to the value for B10.

LS Opening balance sheet
LX Changes in balance sheet
LE Closing balance sheet

# J. Non-financial assets (AN)

- A1.32 Transactions in non-financial assets are classified by the purpose for which the assets are acquired. All assets serve as a store of value but, with the exception of valuables that are solely a store of value, other non-financial assets are primarily acquired for use in production. The AN codes, given in full below, combine some elements of function with a descriptive code. A table, for example, could be part of AN113, machinery and equipment, or almost any of the inventory codes or even as a valuable.
- A1.33 The classification of non-financial assets is split initially between produced (AN1) and non-produced assets (AN2). The three major subheadings for produced assets are fixed assets (AN11), inventories (AN12) and valuables (AN13). The three major subheadings for non-produced assets are natural resources (AN21), contracts, leases and licences (AN22) and purchases less sales of goodwill and marketing assets (AN23).
- A1.34 The entry for AN116, costs of ownership transfer on non-produced assets, is anomalous. The flow exists and is treated as part of fixed capital formation, that is the acquisition of fixed assets. However, when stock levels are itemised, the value of these costs of ownership transfer are included with the non-produced assets to which they refer and so are not shown as part of AN11. The item is included in the full list, shown below, for expository purposes only.

AN1	Produced non-financial assets
AN11	Fixed assets by type of asset
AN111	Dwellings
AN112	Other buildings and structures
AN1121	Non-residential buildings
AN1122	Other structures
AN1123	Land improvements
AN113	Machinery and equipment
AN1131	Transport equipment
AN1132	ICT equipment
AN1139	Other machinery and equipment
AN114	Weapons systems
AN115	Cultivated biological resources
AN1151	Animal resources yielding repeat products
AN1152	Tree, crop and plant resources yielding repeat products
(AN116	Costs of ownership transfer on non-produced assets)
AN117	Intellectual property products
AN1171	Research and development
AN1172	Mineral exploration and evaluation
AN1173	Computer software and databases
AN11731	Computer software
AN11732	Databases
AN1174	Entertainment, literary or artistic originals
AN1179	Other intellectual property products
AN12	Inventories by type of inventory
AN121	Materials and supplies
AN122	Work-in-progress
AN1221	Work-in-progress on cultivated biological assets
AN1222	Other work-in-progress
AN123	Finished goods
AN124	Military inventories
AN125	Goods for resale
AN13	Valuables
AN131	Precious metals and stones
AN132	Antiques and other art objects
AN133	Other valuables
AN2	Non-produced non-financial assets
A N 24	Natural resources
<b>AN21</b> AN211	Naturai resources Land
AN211 AN212	
AN212 AN213	Mineral and energy reserves  Non-cultivated biological resources
AN213 AN214	Water resources
AN215	Other natural resources
AN2151	Radio spectra
AN2151 AN2159	Other
AN22	Contracts, leases and licences
AN221	Marketable operating leases
AN222	Permissions to use natural resources
AN223	Permissions to undertake specific activities
AN224	Entitlement to future goods and services on an exclusive basis
AN23	Purchases less sales of goodwill and marketing assets

# K. Financial assets (AF)

A1.35 As explained in section F, conceptually there is a one-to-one match between the codes shown for transactions in financial assets and liabilities (F codes) and those for stock levels or positions (AF codes) for the same assets and liabilities. In practice, though, balance sheet data may be less detailed and not exist beyond the first-level breakdown, shown below. If desired, however, the AF codes can be disaggregated in line with the detail provided for F codes.

AF Financial assets/liabilities
AF1 Monetary gold and SDRs
AF2 Currency and deposits
AF3 Debt securities

AF4 Loans

AF5 Equity and investment fund shares/units

AF6 Insurance, pension and standardised guarantee schemes
AF7 Financial derivatives and employee stock options

AF8 Other accounts receivable/payable

## L. Supplementary items

A1.36 At various points in the text, the possibility of introducing supplementary items is mentioned. An indication of how supplementary codes may be constructed and suggestions for the most common items follow. A general convention is that a supplementary code begins with X and is linked to the code of a standard item by building on the code of that item.

#### 1. Non-performing loans

A1.37 The following codes apply to stocks and flows of non-performing loans mentioned in chapters 11 and 13. Since loans have the code AF4 and F4, the supplementary codes begin XAF4 for stocks and XF4 for flows. The codes for stocks are:

XAF4\_NNP Loans: nominal value, non-performing Loans: market value, non-performing

and the associated flows

XF4\_NNP Loans: nominal value, non-performing XF4\_MNP Loans: market value, non-performing

In both sets of codes, the underscore is a placeholder for the detailed codes for loans where relevant, for example, on the balance sheet

XAF4NNP Loans: nominal value, non-performing

XAF41NNP Short-term loans: nominal value, non-performing XAF42NNP Long-term loans: nominal value, non-performing

XAF4MNP Loans: market value, non-performing

XAF41MNP Short-term loans: market value, non-performing XAF42MNP Long-term loans: market value, non-performing

#### 2. Capital services

A1.38 The following codes apply to capital services described in chapter 19.

XCS Capital services

XCSC Capital services – Corporations and general government

P61 Consumption of fixed capital

XRC Return to capital XOC Other costs of capital

XCSU Capital services – Unincorporated enterprises

P62 Consumption of fixed capital

XRU Return to capital XOU Other costs of capital

#### 3. Pensions table

A1.39 The following codes apply to the supplementary table described in part 2 of chapter 17. Different code are proposed for the columns and rows of the table.

#### Columns

A1.40 In the Column description the letter "W" corresponds to "non-government" and the numbers in these codes refer to the corresponding institutional sectors.

#### Liabilities recorded in the main sequence of accounts

Schemes where responsibility for the design and implementation lies outside general government

XPC1W Defined contribution schemes XPB1W Defined benefit schemes

XPCB1W Total

Schemes where responsibility for the design and implementation lies within general government

XPCG Defined contribution schemes

General government employee defined benefit schemes

XPBG12 In the financial corporations sector XPBG13 In the general government sector

#### Liabilities not recorded in the main sequence of accounts

XPBOUT13 In the general government sector XP1314 Social security pension schemes

XPTOT Total pension schemes

XPTOTNRH Of which: Non-resident households

#### Rows

#### Opening balance sheet

XAF63LS Pension entitlements

#### **Transactions**

XD52p Social contributions relating to pension schemes

XD5211 Employer actual social contributions
 XD5221 Employer imputed social contributions
 XD5231 Household actual social contributions
 XD5241 Household social contribution supplements

XD529 Other (actuarial) accumulation of pension entitlements in social security funds

XD53p Pension benefits

XD6 Change in pension entitlements

XD591 Change in pension entitlements due to transfers of entitlements

#### Other economic flows

XK51 Changes in entitlements due to negotiated changes in scheme structure

XK7 Revaluations

XK52 Other changes in volume

Closing balance sheet

XAF63LE Pension entitlements

#### Related indicators

XP1 Output

XAFN Assets held by pension schemes at end-year

#### 4. Consumer durables

A1.41 Consumer durables are referred to in chapters 3 and 13. They are coded using X as a prefix plus DHHCE (durable household consumption expenditure) plus a one digit affix for subgroups and two digits for the items. The corresponding COICOP numbers are also provided.

COICOP	SNA codes		
05.1.1 05.1.2 05.3.1 05.5.1	XDHHCE1 Fo XDHHCE11 XDHHCE12 XDHHCE13 XDHHCE14	urniture and household appliances Furniture and furnishings Carpets and other floor coverings Major household appliances whether electric or not Major tools and equipment for house and garden	
	XDHHCE2 Personal transport equipment		
07.1.1	XDHHCE21	Motor cars	
07.1.2	XDHHCE22	Motor cycles	
07.1.3	XDHHCE23	Bicycles	
07.1.4	XDHHCE24	Animal drawn vehicles	
	XDHHCE3 Re	ecreational and entertainment goods	
08.2.0	XDHHCE31	Telephone and telefax equipment	
09.1.1	XDHHCE32	Equipment for the reception, recording and reproduction of sound and pictures	
09.1.2	XDHHCE33	Photographic and cinematographic equipment and optical instruments (D)	
09.1.3	XDHHCE34	Information processing equipment	
09.2.1	XDHHCE35	Major durables for outdoor recreation	
09.2.2	XDHHCE3 M	usical instruments and major durables for indoor recreation	
	XDHHCE4 O	ther durable goods	
12.3.1	XDHHCE41	Jewellery, clocks and watches	
06.1.3	XDHHCE42	Therapeutic medical appliances and equipment	
• • • • • •			

#### 5. Foreign direct investment

A1.42 Supplementary items for foreign direct investment (FDI), referred to in, for example, chapters 11 and 13, can be coded with X as prefix plus the F or AF code plus a FDI suffix, for example:

XF42FDI	for foreign direct investment transaction in long term loans
XAF42FDI	for foreign direct investment stock of long term loans

# 6. Contingent positions

Supplementary codes for contingent positions, mentioned in chapters 11 and 12, can be coded with X as prefix plus the AF code plus a CP suffix, for example:

XAF11CP when the pledge of monetized gold may affects its usability as reserve asset

#### 7. Currency and deposits

Supplementary for the classification of national and foreign denominated currency and deposits, as mentioned in chapter 11, can be coded with X as prefix plus the F or AF code plus a suffix NC indicating currency and deposits in national currency or an affix FC with and international currency code indicating currency and deposits in foreign currency, for example:

For transactions

XF21NC for currency in national currency.

XF21FCEUR for currency in Euro.

XF22NC for deposits in national currency.

XF221FCEUR for deposits in Euro.

For stocks

XAF21NC for currency in national currency.

XAF21FCEUR for currency in Euro.

XAF22NC for deposits in national currency.

XAF221FCEUR for deposits in Euro.

#### 8. Classification of debt securities according to outstanding maturity

A1.43 Chapter 11 suggests classifying debt securities according to outstanding maturity. This can be achieved by using an X prefix plus the AF code plus a suffix indicating a maturity date, for example:

XAF32Y20 for debt securities maturing in 2020.

#### 9. Listed and unlisted debt securities

A1.44 Supplementary items on debt securities can be coded with X as prefix plus the F or AF code plus a 1 for listed and 2 for unlisted, for example:

For transactions

XF321 for transaction in listed debt securities XF322 for transaction in unlisted debt securities

For stocks

XAF321 for stocks of in listed debt securities XAF322 for stocks of unlisted debt securities shares

# 10. Long term loans with outstanding maturity of less than one year and long term loans secured by mortgage

A1.45 Long term loans with outstanding maturity of less than one year and long term loans secured by mortgage can be coded with X as prefix plus the F of AF code plus an affix L1 indicating outstanding maturity of less than one year and a suffix LM indicating loans secured by mortgage, for example:

For transactions

XF42L1 for long term loans with outstanding maturity of less than one year

XF42LM for long term loans secured by mortgage

For stocks

XAF42L1 for long term loans with outstanding maturity of less than one year

XAF42LM for long term loans secured by mortgage

# 11. Listed and unlisted investment shares

A1.46 Listed and unlisted investment fund shares can be coded with X as prefix plus the F or AF code plus 1 for listed and 2 for unlisted, for example:

For transactions

XF5291 for transaction in listed investment fund shares XF5292 for transaction in unlisted investment fund shares For stocks
