

Item 4 (i) "World Statistics Day"

Intervention by Cambodia

Thank Mr. Chair,

The National Institute of Statistics of Cambodia see the World Statistics Day as a very important event to campaign for more resource that is very limited and under many pressing priorities.

We appreciate the slogan "Better Data Better lives" and accept it.

We are please to coordinate with the secretariat for a successful event in Cambodia.

We plan to have a message from the top executive leader of the country, Prime Minister emphasizing on the importance of statistics and call for support, hoping that it will help influence for better resource and implementation.

We hope that the secretariat would also have a message of the Secretary-General so that we can take use of it in the media in our country.

Thank you very much Mr. Chair.
