

# First Webinar of the Data Strategy Sprint of the United Nations Network of Economic Statisticians – A Primer on Developing a Data Strategy

7:00 am -10:00 am, 4 June 2024, New York time

## Poll Questions

### Question 1

Does your organization have a formal Data Strategy (DS)? A DS is defined as a course of action for managing and leveraging data assets to ensure their optimal use and value, while maintaining public trust and data protection.

- Yes
- No
- Currently in development
- Do not know

### Question 2

Defining data stewardship as the longer-term strategic implementation process of the DS and data governance framework for enhancing the value of data who in your country is assigned the role of government data steward?

- National Statistical Office
- Other government department
- It is a shared role across government
- This role is not defined
- Do not know

### Question 3

The terms used in the context of defining, developing and implementing a formal DS do not have standardized definitions. In your opinion, should NSOs take the leadership in developing an internationally agreed standard terms and definitions?

- Yes, NSOs should take the lead
- Yes, but other organizations, in addition to NSOs should be involved
- No, most countries already use their own terminology
- No, standardization would be impossible to achieve
- No, NSOs are not best suited for this role
- Do not know

#### Question 4

Do you think that the development of a **primer/template DS framework** document, providing an overview of what has been learned so far, would be a useful tool for organizations currently developing or planning to develop and implement a data strategy?

- Yes, this would be a useful tool
- No, my organization/country would not use it
- No, my organization/country already has its own framework
- Do not know
