Third Meeting of the United Nations Network of Economic Statisticians
Virtual, 7:00 am -8:30 am, 26 September 2023, New York time (GMT -4)

Questions for the Live Poll

_____

1. Which of the following areas of statistical development would you consider top priorities for your organization?

- leveraging administrative and big data sources
- data integration: combining economic, social, environmental and geo-spatial data to produce integrated data products.
- improving data accessibility through open data platforms, and third-party applications to access and use statistical data
- adopting advanced analytical techniques such as machine learning, predictive analytics and spatial analysis

2. What are some of the policy priorities which require data driven solutions in your country?
- economic growth and inequality
- agriculture and food security
- environment and natural resources
- safety and security
- governance and corruption
- gender and social inclusion
- technology and innovation
- international trade and trade integration

3. Identify the best way in which the UN Network of Economic Statisticians could assist your organization in achieving its goals

- facilitating knowledge sharing and collaboration for mutual learning and development
- advocating for open data platforms and promoting data literacy
- assisting in and modernization of national statistical systems
- assisting in the development of legal frameworks for national statistical systems, ensuring their independence, the use of scientific principles and statistical integrity
- assisting in data sharing and exchange of administrative data for register based collections and data integration.
