Different Levels of SDG Monitoring

SDSN Report «Indicators and a Monitoring Framework for the SDGs», published 18 Feb 2015 by the Leadership Council of SDSN

Global monitoring:

- based on a core set of global indicators
- harmonised to common global standards
- predominantly taken from official data
- applicable to all countries

Role of statistics, politics & science

Statistics

Selection of appropriate indicators
Stipulate independent way to measure
Definition of statistical & quality standards
Ensure independent monitoring
...

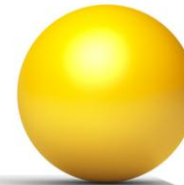

...

Politics

Definition of goals & targets
Financing implementation
Design of accountability
...

...

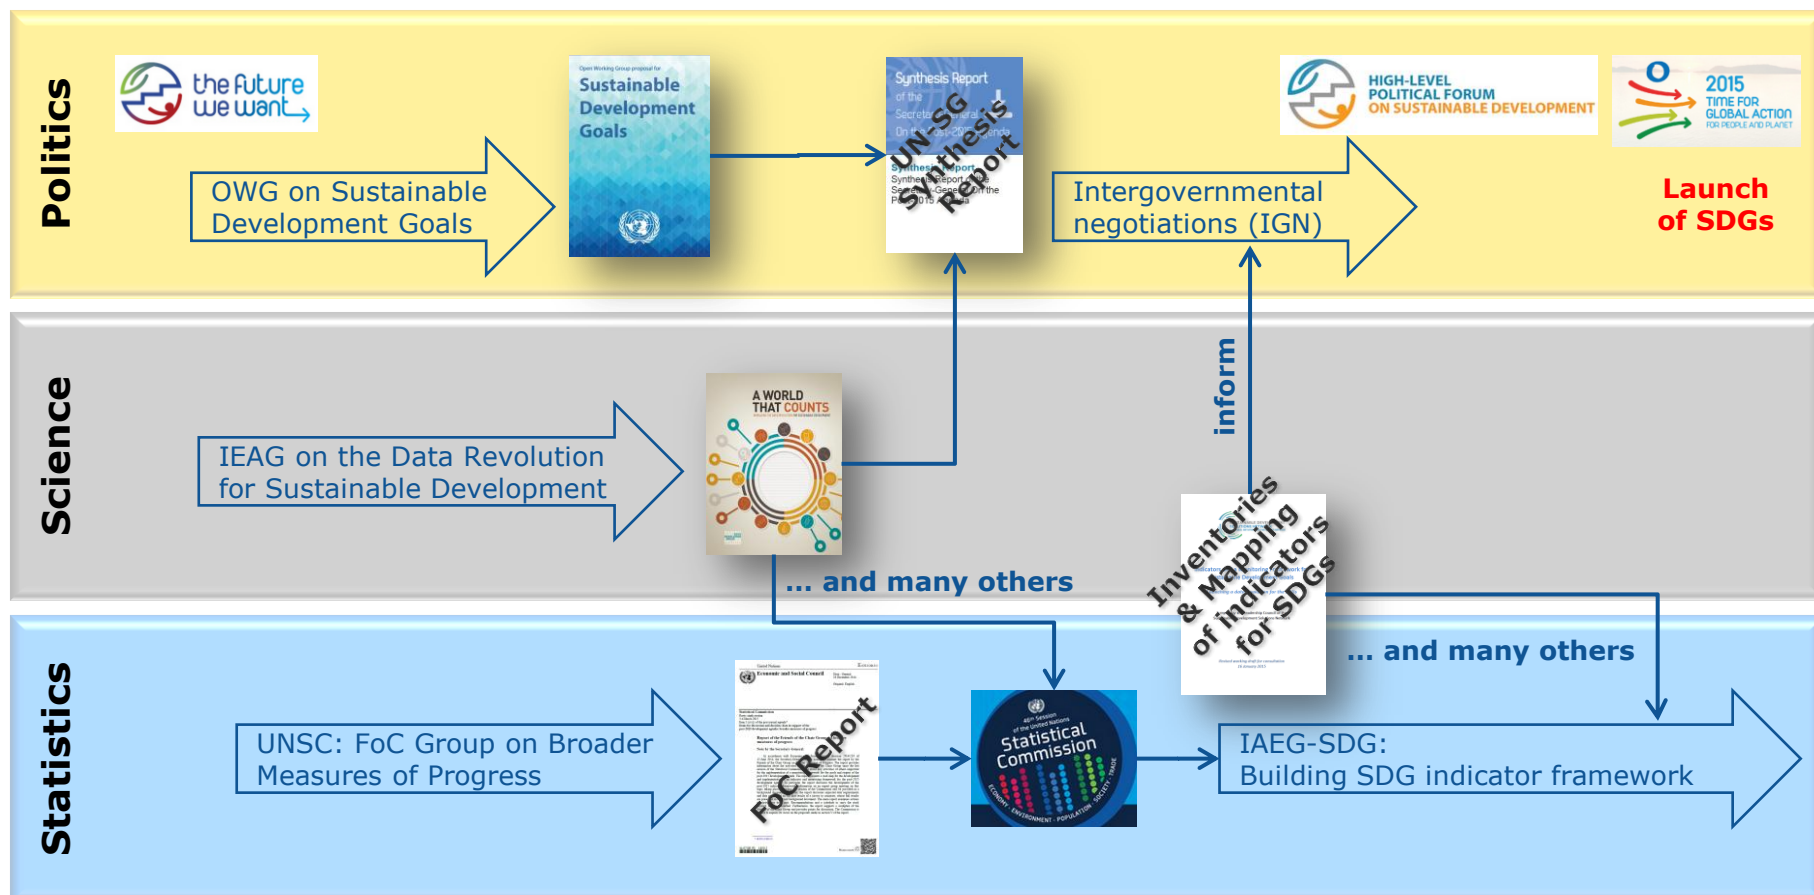

Science

Research new methods, models and concepts
...

...
