

IMTS 2010

# Data quality & metadata

## 1. Data quality.

- ∞ To ensure the quality of the data, a national subcommittee of trade statistics has been established( NISR, NBR and RRA).
- ∞ The indicators of IMTS 2010 are produced in responding to the needs of the users.

- ∞ The data are disseminated according to the international comparability and the general trade methodology is used.

## 2. Metadata.

- ∞ The data are disseminated in a way that a description of all underlying concepts, definitions, references, data sources and methods of estimations are given.

- ∞ The NISR is trying to include the IMTS 2010 in the online database developed IMIS RWANDA and DEVI-INFO so that users can develop their own indicators according to their needs.

3. Strategies for improving the data quality:
  - ∞ The National Sub Committee of IMTS 2010 need trainings in EUROTRACE and other softwares of IMTS compilation.
  - ∞ This committee has to meet on regular basis.

IMTS 2010

Thank you for your kind attention!!!
