

# Workshop on updated and new recommendations for International Merchandise Trade Statistics (IMTS 2010) and their implementation in countries of the Sub-Saharan Africa region

Lusaka, Zambia, 1-5 November, 2010

## Agenda item 18: Supplementary topics

**Presentation by Matthias Reister**  
Chief, International Merchandise Trade Statistics Section  
Trade Statistics Branch, United Nations Statistics Division  
E-mail: [reister@un.org](mailto:reister@un.org)

# IMTS 2010 Chapter XI

## Supplementary topics

### A. External trade indices

- **It is recommended** that all countries produce and publish volume (quantum) indices and either price or unit value indices for their total imports and exports on a monthly, quarterly and annual basis. Countries are also encouraged to calculate and publish such indices for commodity groups of particular importance to countries at least quarterly and annually.
- Conceptual and compilation issue: Price vs. unit value indices; How to do it.
  - More detailed information and guidance on good practices will be provided in revised IMTS Compilers Manual

# IMTS 2010 Chapter XI

## Supplementary topics

### B. Seasonally adjusted data

- **Countries are encouraged** to compile and publish, where appropriate, seasonally adjusted monthly and quarterly international merchandise trade data on a regular basis.
- **It is recommended** that information on the adjustment methods, data quality etc. should be provided by countries in their metadata.

# Chapter XI - Supplementary topics

## C. Linking trade and business statistics

- **Countries are encouraged** to integrate their trade register with their business register and to take steps towards an integrated system of economics statistics for data compilation and analysis.
  - **Further examples of the applications of linking trade and business statistics will be provided in the IMTS Compilers Manual.**
- **Need for linking business and trade statistics:**
  - Significant efficiency and quality gains in data collection.
  - New information for many analytical purposes that otherwise would not exist.
    - **One application is the analysis of trade by enterprise characteristics which, for example, allows to examine the impact of globalization on businesses.**

# Annex F - Conceptual differences between IMTS2010 and BPM6

**Table F.1. Reconciliation between IMTS and total goods on a balance of payment basis**

	Exports	Imports
<b>Merchandise trade statistics as provided in data source</b>		
<b>Adjustments, as relevant:</b>		
For example (with paragraph reference)		
- Goods sent for or returned after processing without a change of ownership (F.3)		
+ Goods acquired from other economies for processing abroad (F.3)		
+ Goods sold abroad after processing in other economies (F.3)		
...		
<b>= Total goods on a balance of payment basis</b>		

# Thank you for your attention!
