- Predominant centre of economic interest
- Global Production
 - Goods sent abroad for processing
 - Merchanting

Guide to Globalization in National Accounts

- MNEs and allocation of value added
- MNEs and FDI
- SPEs
- Goods for Processing
- Merchanting
- IPP Transactions
- Global Manufacturing

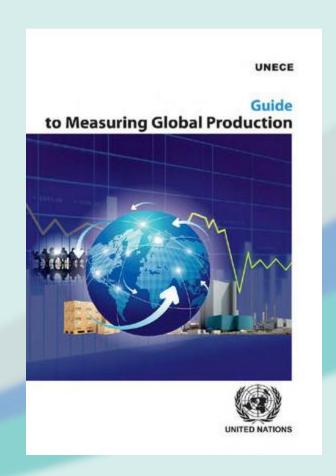

www.cso.ie

3

Guide to Measuring Global Production

- Typology of Global Production
- Economic Ownership in general and IP
- Measuring Global Production

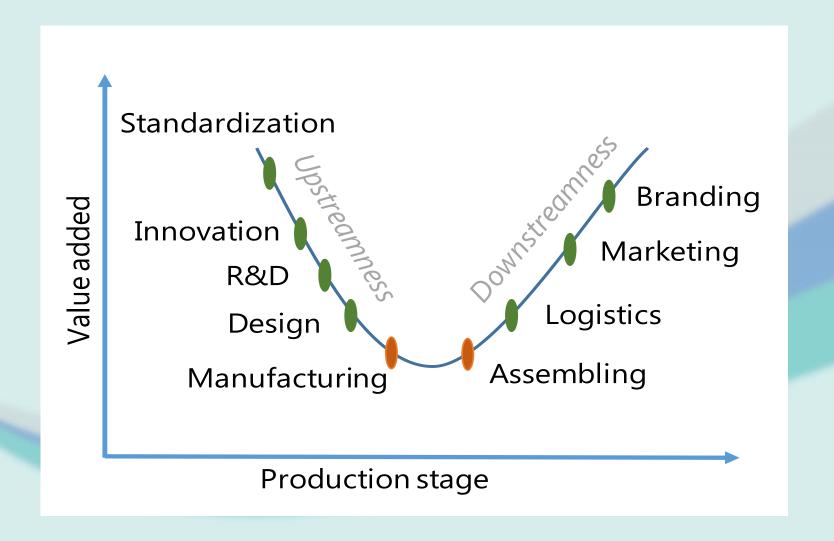

Globalisation Measurement Challenges

- Centre of economic interest (resident units)
 - Corporate Relocations of assets, particularly intellectual property (IP)
 - Headquartering: re-domiciled firms & corporate inversions
- Change of economic ownership
 - Contract Manufacturing, significant MNE activity, but also carried out by domestic firms
 - Aircraft leasing

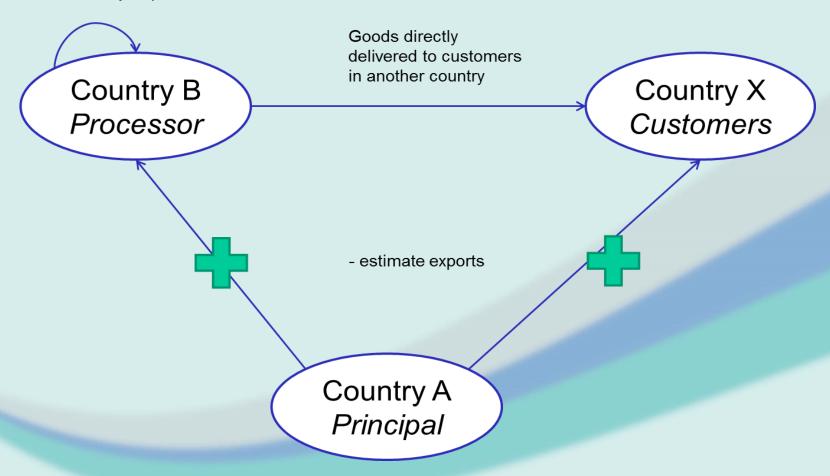

GVC Framework

Goods directly delivered to customers in the country of processor

Goods directly delivered to customers in the country of processor

- estimate exports

Country B Processor Inventories held abroad

- estimate changes

Goods directly delivered to customers in another country

- estimate exports

Country X Customers

Goods purchased abroad for processing - estimate imports

Goods sent abroad for

processing

- remove exports recorded in IMTS

Goods sent back after processing

- remove imports recorded in IMTS
- estimate imports of services (as processing fee)

Goods delivered to resident customers

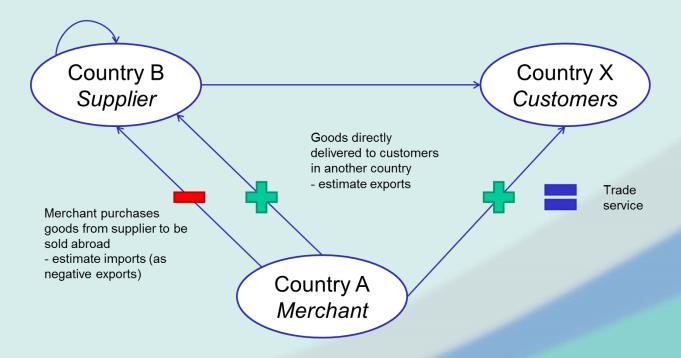

- as domestic production

Country A *Principal*

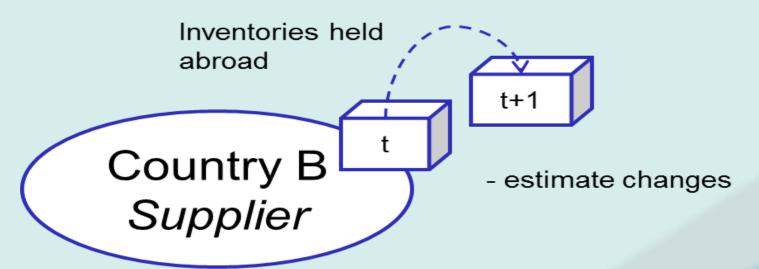

Goods delivered to customers in another country through country of the processor

- as recorded in IMTS

Country A *Principal*

R&D

- Expenditure incurred in the development of R&D assets
- R&D related services such as royalties and licenses which related to the use of assets created by R&D activities
- The R&D assets themselves i.e. intellectual property products (IPPs).

IP Assets - R&D

in the domestic economy,

or

through the use of contract manufacturing arrangements abroad

or

 through the export of royalties to other non-resident affiliates.

Tangible Capital Assets

- Aircraft highly mobile tangible assets
- Can be operating anywhere in the globe
- Substantial depreciation charges
- Domestic impact ?

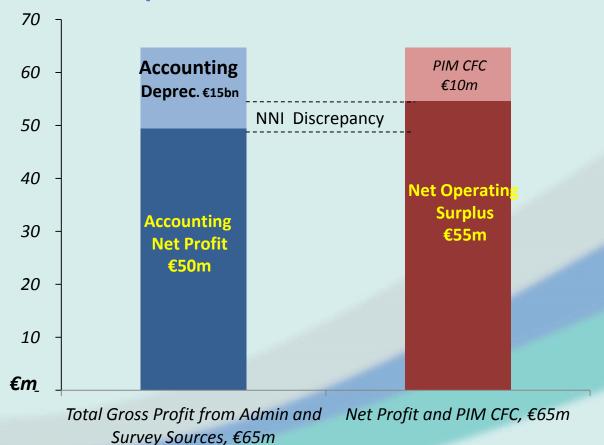

Income and Expenditure GDP

$$C + I + G + (X - M) = GDP + NFI + N T = GNI$$

$$NOS + COE + Deprec + (T-S) = GDP$$

Impact of Depreciation - IP Assets R&D

Data Sharing

- Cross institutional
- Within institutions
- Whole of Government
- Whole of Statistical System
- Cross Border

Corporate Inversions

- Re headquartered listed companies
- Centre of economic interest has changed
- Economic owner has changed
- Where is the value added being attributed
- Become Financial transactions in reinvested earnings

Other Issues

- Price and Volume measures
 - Industrial processing services
 - Trade in services merchanting
 - Intra company services
 - IPP related services
- Economic classification FGP
