Statistical Releases

Statistical Release VI: Housing and Household Characteristics

Housing is one of the basic human needs that have a deep impact on health, welfare, social attitudes and economic productivity of the individual. It is also one of the best indicators for the people's standard of living in the society.

Statistical Release V: Nuptiality & Fertility

Nuptiality and Fertility are one of the most important determinants of population dynamics and growth in a country. The census is the main source of information to ascertain the growth of population and its various characteristics at national and local level. These measures pave way for policy makers to formulate related policies for socio-economic needs of the population.

Statistical Release IV: Employment

This release is a brief analysis of the current labour market situation as it provides the most recent and comprehensive data of the working age population. It provides input for analysing the labour market situation, policy formulation as well as planning, implementing and monitoring programmes related to human resource development.
