Presented at High Level Seminar on The Digital Economy: A Policy and Statistical Perspective
Beijing, 15-17 November 2018

Outline

- Background
- Initiatives effort capturing e-commerce
- Issues and challenges
- Preliminary result

THE 4.0th INDUSTRIAL REVOLUTION

The Fourth Industrial Revolution is using physical cyber systems, focusing on end-to-end digitization of all physical assets, fusing technologies, and in the process blurring the lines between the physical, digital, and biological spheres.

(WEF 2016, pwc 2016, Tungboriboonrat 2017)

This shift has resulted in the rise of
the digital economy

DIGITAL ECONOMY

“

OECD, 2015

The result of a transformative process brought by information and communication technology (ICT), which has made technologies cheaper, more powerful, and widely standardized, improving business processes and bolstering innovation across all sectors of the economy.

“

Asian Development Bank Institute, 2017

The digital economy comprises e-commerce, app stores, online advertising, online payment services, cloud computing, and participative networked platforms, amongst others.

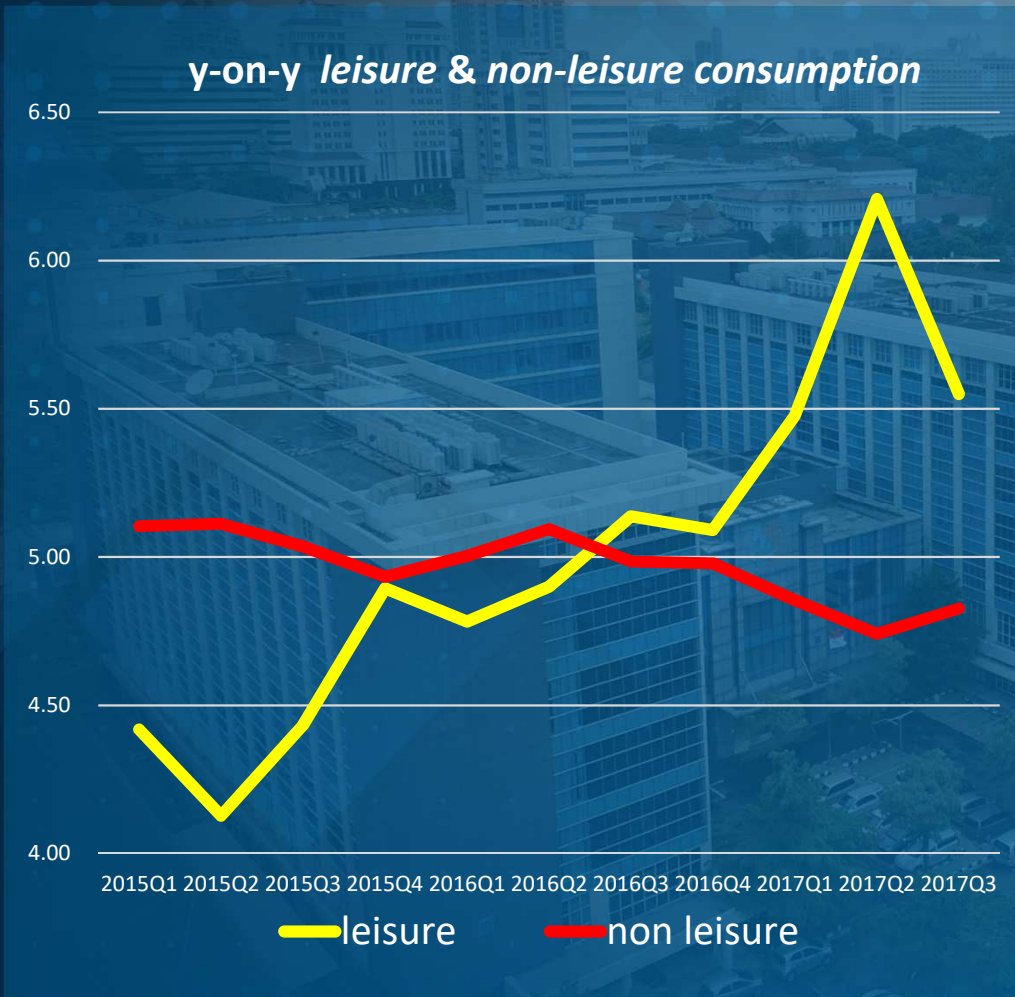

E-COMMERCE

“...the sale or purchase of goods and services conducted over computer networks by methods specifically designed for the purpose of receiving or placing orders. The goods or services are ordered by those methods, but the payment and the ultimate delivery of the goods and services do not have to be conducted online...”

OECD, 2010

1. Shift to leisure, exist?

2. Disruption exist? > Shift off-line to on-line?

- Then how Indonesia be prepared facing digital era?
