FOREWORD

This brochure presents all of the amendments to the Nomenclature appended to the International Convention on the Harmonized Commodity Description and Coding System which have been accepted as a result of the Customs Co-operation Council Recommendation of 26 June 2009. It also includes the corrigendum amendments which were adopted following the acceptance of the Recommendation of 26 June 2009.

All of the legal texts of the amendments have been reproduced and their background, nature and scope are briefly explained. The amendments are commented on individually item by item.

The introduction sets out the origin and general scope of the updating project and outlines the rules for assigning code numbers to the subheadings created or amended. The Annexes provide specific information on the scope of the amendments.

This brochure is designed to facilitate the interpretation and implementation of the legal texts but is only a guide and has no legal status.

* * *

INTRODUCTION

I. Background to the updating of the Harmonized System

The Preamble to the International Convention on the Harmonized Commodity Description and Coding System emphasizes the importance of ensuring that the Harmonized System is kept up to date in the light of changes in technology and patterns of international trade.

Article 7 of the Convention further states that it is for the HS Committee to propose such amendments to the Convention as may be considered desirable, having regard, in particular, to the needs of users.

At its First Session, the HS Committee decided to set up the Harmonized System Review Sub-Committee, which has the task of revising the HS in accordance with the Committee's general indications and preparing the necessary amendments to the HS Nomenclature.

The Committee also agreed to allow an interval of four to six years between each Recommendation amending the HS Nomenclature under Article 16 of the Convention.

In this context, it was decided to effect a general review of the HS Nomenclature, and a draft amendment was submitted to the Council by the HS Committee on the basis of the texts drawn up by the Review Sub-Committee.

At its 113th/114th Sessions held in Brussels from 25 to 27 June 2009, the Council adopted the Article 16 Recommendation amending the Harmonized System.

On 8 July 2009, the Secretary General of the WCO notified Contracting Parties of the amendments adopted by the Council, drawing attention to Article 16.2 of the Convention which stipulates that any Contracting Party may notify the Secretary General of an objection to a recommended amendment.

Having received an objection to the deletion of subheading 5308.10 relating to "Coir yarn", this amendment was deleted from the Recommendation.

All other recommended amendments were deemed to be accepted and will enter into force on 1 January 2012 in accordance with Article 16.4 (b) of the Convention.

After the acceptance of those amendments, the Contracting Parties noticed that certain consequential amendments were needed in order to correct factual errors or omissions. Therefore, several corrigendum amendments were also adopted. These corrigendum amendments have been identified in the middle column of the part regarding the "Explanation of the Amendments" of this brochure by a (+) sign and the right hand column includes a particular explanation.

It is to be noted that, as agreed by the HS Committee, the corrigendum amendments will not be binding on the Contracting Parties until they enter into force under Article 16 of the

HS Convention. Nevertheless, under the corrigendum procedure, the Contracting Parties will be free to apply the corrigendum amendments as from 1 January 2012 to reflect the situation as from that date.

II. General scope of the amendments

This Recommendation is the fifth to amend the Harmonized System under the Article 16 procedure since the Council approved the Harmonized System Convention in 1983, though it is only the fourth to make major amendments of the Harmonized System. This Recommendation includes **220 sets of amendments**, divided as follows : agricultural sector 98; chemical sector 27; paper sector 9; textile sector 14; base metal sector 5; machinery sector 30; other sectors 37.

The Committee did not confine itself to examining matters linked to changes in technology or patterns of international trade. The opportunity was taken to clarify certain texts in order to facilitate the uniform application of the HS and to provide legal certainty with regard to classification decisions taken by the Committee. Other texts have been amended to render them more consistent with scientific or customary terminology or with trade practice.

Environmental and social issues of global concern are the major feature of the HS 2012 amendments, particularly the use of the HS as the standard for classifying and coding goods of specific importance to food security and the early warning data system of the United Nations' Food and Agriculture Organization (FAO). The volume of amendments within, for instance, Chapter 3, for the separate identification of certain species of fish and crustaceans, molluscs and other aquatic invertebrates, is substantial. However, the modifications aim at improving the quality and precision of trade data in these commodities. The amendments include, *inter alia*, improved specifications for species from the Southern hemisphere. These amendments will enable economic trends in products other than those familiar to North Atlantic consumers to be monitored. In the same vein, new subheadings have been created for the separate identification of certain edible vegetables, roots and tubers, fruit and nuts, as well as cereals.

The HS Nomenclature 2012 Edition also features new subheadings for specific chemicals controlled under the Rotterdam Convention and ozone-depleting substances controlled under the Montreal Protocol.

The following examples show other main sources of the amendments made to the Nomenclature:

- **Technological progress** : A modification of the structured nomenclature of heading 27.10, a new Subheading Note 5 to Chapter 27, a new heading 38.26 and new Note 7 to Chapter 38 for biodiesel and mixtures thereof; amendment of the structured nomenclature of heading 85.07 for nickel-metal hydride and lithium-ion accumulators (storage batteries); revision of subheadings of heading 95.04 for video game consoles and machines.
- **Trade patterns** : Deletion of 43 subheadings on account of the low volume of trade (see Annex A).

- **Clarification of texts to ensure uniform application of the HS** : Amendment of the text of Note 2 to Chapter 30 for “immunological products”; regrouping of sanitary towels (pads) and tampons, napkins and napkin liners for babies and similar articles, of any material, in heading 96.19.
- **Adaptation of the Nomenclature to reflect trade practice** : new subheadings have been created for lilies (*Lillium spp.*) in heading 06.03, for non-centrifugal cane sugar in heading 17.01, for sweetened dried cranberries and cranberry juice in headings 20.08 and 20.09, respectively, for water pipe tobacco in heading 24.03, for wood-pellets in heading 44.01, for passenger boarding bridges in heading 84.79 and for unrecorded and recorded optical media in heading 85.23.

The amendments therefore reflect changes in trade and technology but, in addition, they reinforce the multipurpose nature of the Nomenclature by taking account of the needs of the various users.

III. Assignment of code numbers to amend subheadings

The HS Nomenclature’s objectives include the facilitation of international trade and the collection, comparison and analysis of trade statistics. To achieve these objectives, the stability of the HS structure and the historical continuity of trade statistics have to be maintained.

Given the intervals at which the HS is reviewed and the scale of the amendments introduced in the framework of the previous review cycles and their impact on the structure of the HS Nomenclature, it proved necessary to lay down general principles regarding the numbering of new or modified subheadings and the reuse of deleted code numbers.

It was therefore decided to adopt the following rules **provided they are compatible with the structure of the HS** :

- (a) Code numbers are changed only where there is an amendment to the text of a heading or subheading **and** where there is a significant change of scope in the subheading(s) concerned.
- (b) The renumbering referred to in (a) above is confined to the **specific** subheadings (at one-dash level, fifth digit; or at two-dash level, sixth digit); the code numbers of those **residual** subheadings whose scope has been amended remain unchanged.
- (c) The code numbers of deleted subheadings are not reused until a certain period has elapsed, **unless** unavoidable.

It became clear, however, when finalizing the amended texts that the structure of the HS does not allow a uniform and systematic application of these principles, certain subheadings have been significantly modified in scope but retain the same code number (see Annex C). For example, code number 3002.10 has been maintained though the subheading has been expanded to cover other immunological products which are directly involved in the regulation of immunological processes.

It is also pointed out that not reusing the code numbers of deleted subheadings disrupts the continuity (systematic order of the code numbers) adopted when the HS Nomenclature was prepared and leads to gaps in the numbering. By way of example, heading 03.04 begins with subheading '0304.31' and not '0304.11'.

EXPLANATION OF THE AMENDMENTS

Notes

The table below shows only those parts of the Harmonized System, which are affected by the WCO Council Recommendation of 26 June 2009 to amend the Harmonized System.

The left hand column (HS 2007) contains the texts of relevant Section, Chapter or Subheading Notes, and headings and subheadings, as they presently exist (i.e., 2007 edition). The centre column contains the corresponding texts as they will read following the implementation of the Council Recommendation.

The underlined texts (except for the references to Chapters) indicate the HS 2012 amendments. However, editorial amendments have been omitted from this table and the left hand column shows the reference “[omitted]”.

It should be noted that the content of a heading or subheading may have changed without the text of a heading or subheading being amended. For example, the scope of a residual subheading may have been expanded because of the deletion of a specific subheading within the same heading. In that case the deleted subheading is shown in the left hand column, while the centre column shows the reference “[deleted]”.

HS 2007	HS 2012	Remarks
<u>CHAPTER 1.</u>	<u>CHAPTER 1.</u>	
<u>Note 1 (a).</u> (a) Fish and crustaceans, molluscs and other aquatic invertebrates, of heading 03.01, 03.06 or 03.07;	<u>Note 1 (a).</u> (a) Fish and crustaceans, molluscs and other aquatic invertebrates, of heading 03.01, 03.06, 03.07 <u>or 03.08</u> ;	Amendment made consequential to the creation of new heading 03.08 . Amendment adopted as a result of the FAO proposal to enhance the monitoring of the global food security.
<u>0101.10</u> - <u>Pure-bred breeding animals</u> 0101.90 - Other	- <u>Horses</u> : <u>0101.21</u> -- <u>Pure-bred breeding animals</u> <u>0101.29</u> -- <u>Other</u> <u>0101.30</u> - <u>Asses</u> 0101.90 - Other	Subdivision of subheading 0101.10 to provide separately for horses and asses. Amendment adopted as a result of the FAO proposal to enhance the monitoring of the global food security.

HS 2007	HS 2012	Remarks
0102.10 - <u>Pure-bred breeding animals</u> 0102.90 - Other	- <u>Cattle</u> : 0102.21 -- <u>Pure-bred breeding animals</u> 0102.29 -- <u>Other</u> - <u>Buffalo</u> : 0102.31 -- <u>Pure-bred breeding animals</u> 0102.39 -- <u>Other</u> 0102.90 - Other	Subdivision of subheading 0102.10 to provide separately for cattle and buffalo. Amendment adopted as a result of the FAO proposal to enhance the monitoring of the global food security.
0105.19 -- <u>Other</u>	0105.13 -- <u>Ducks</u> 0105.14 -- <u>Geese</u> 0105.15 -- <u>Guinea fowls</u>	Subdivision of subheading 0105.19 to provide separately for ducks, geese and guinea fowls. Amendment adopted as a result of the FAO proposal to enhance the monitoring of the global food security.
0106.12 -- Whales, dolphins and porpoises (mammals of the order Cetacea); manatees and dugongs (mammals of the order Sirenia)	0106.12 -- Whales, dolphins and porpoises (mammals of the order Cetacea); manatees and dugongs (mammals of the order Sirenia); <u>seals, sea lions and walruses (mammals of the suborder Pinnipedia)</u>	Expansion of the scope of subheading 0106.12 to include seals, sea lions and walruses. Amendment adopted as a result of the FAO proposal to enhance the monitoring of the global food security.
0106.19 -- Other	0106.13 -- <u>Camels and other camelids (<i>Camelidae</i>)</u> 0106.14 -- <u>Rabbits and hares</u> 0106.19 -- Other	Creation of new subheadings 0106.13 and 0106.14 to provide separately for camels and other camelids (<i>Camelidae</i>) and rabbits and hares. Amendment adopted as a result of the FAO proposal to enhance the monitoring of the global food security.
0106.39 -- Other	0106.33 -- <u>Ostriches; emus (<i>Dromaius novaehollandiae</i>)</u> 0106.39 -- Other	Creation of new subheading 0106.33 for ostriches and emus. Amendment adopted as a result of the FAO

**CORRELATION TABLES
BETWEEN THE 2007 VERSION AND THE 2012 VERSION
OF THE HARMONIZED SYSTEM**

TABLE OF CONTENTS

	<i>Pages</i>
- Introduction	(II.)
- Table I Correlating the 2012 version to the 2007 version of the Harmonized System.....	(1/1.) to (1/22.)
- Table II Correlating the 2007 version to the 2012 version of the Harmonized System.....	(2/1.) to (2/18.)

INTRODUCTION

This publication contains the tables correlating the 2007 and 2012 versions of the Harmonized System (HS), as drawn up by the World Customs Organization Secretariat in accordance with instructions received from the Harmonized System Committee.

Though these Correlation Tables were examined by the Harmonized System Committee, they are not to be regarded as constituting classification decisions taken by that Committee; they constitute a guide published by the Secretariat and whose sole purpose is to facilitate implementation of the 2012 version of the Harmonized System. **They do not have legal status.**

During the discussions within the Review Sub-Committee and the Harmonized System Committee aimed at amending the HS Nomenclature, several differing views emerged concerning the present classification of certain goods, without the Committee ruling officially on their classification. It was agreed that the Tables should be as comprehensive as possible and thus include correlations supported by several Contracting Parties, even if the subheadings mentioned did not reflect the views expressed by the majority within the Committee. **The Correlation Tables might be subject to further amendments or changes.** The most recent version is reproduced on the WCO Web site (www.wcoomd.org).

Table I establishes the correlation between the 2012 version and the 2007 version of the HS. It contains remarks opposite certain correlations briefly specifying the nature of the goods transferred. In many cases, reference has also been made to the amended legal provisions. In addition, where differing views emerged within the Harmonized System Committee concerning the present classification of certain goods, an annotation has been added opposite the subheadings concerned.

The left-hand column of Table I refers to the HS 2012 code numbers whose scope has been changed compared with HS 2007, or which have been introduced as new entries. The centre column contains the corresponding HS 2007 code numbers, and may be preceded by "ex". This prefix indicates that the corresponding HS 2012 entry contains only part of the referenced subheading. For example, new subheading 0305.43 contains a part of the HS 2007 code number 0305.49, which is, therefore, preceded by "ex". The other part of HS 2007 code number 0305.49 is covered by new subheading 0305.44 or remains in subheading 0305.49.

In some cases, however, the code number has been changed though its content remains the same. For example, subheadings 2903.81 to 2903.99 (HS 2012) have the same scope as HS 2007 code numbers 2903.51 to 2903.69, respectively. The renumbering was necessary because of the structure of the nomenclature of heading 29.03.

In other cases, the code number has not been changed, although the scope of the subheading did change, in particular when it concerned so-called residual subheadings. For example, code number 2937.90 has not been changed, despite the fact that the subheading now also covers the contents of HS 2007 subheadings 2937.31, 2937.39 and 2937.40 (which were deleted due to low trade volumes), whereas, on the other hand, certain products of HS 2007 subheading 2937.90 will transfer to HS 2012 subheading 3002.10.

Table II establishes the correlation starting from the 2007 version to the 2012 version of the HS. It is simply a mechanical transposition of Table I and therefore includes no remarks.

Table II contains the HS 2007 code number references in the left-hand column, with the corresponding HS 2012 entry in the right-hand column. The prefix "ex" is used in the same way as it has been used in Table I, i.e., to indicate that only a part of the subheading concerned is covered by the code number referred to in the left-hand column.
