Standard International Trade Classification Revision 3

Series M 34 rev. 3

Year 1986

This basic classification, known as SITC, Rev. 3, groups all commodities into headings suitable for economic analysis. SITC is recommended by the United Nations for use in all countries for their external trade data and thus promotes international comparability of trade statistics. This publication describes the history of SITC and usage and two annexes show the correspondence between the basic headings of the Harmonized Commodity Description and Coding System (HS) of the Customs Co-operation Council and SITC, Rev. 3, and between Revision 2 and Revision 3 of SITC.
