BPM6 Definition of Monetary and Non-Monetary Gold

Monetary gold is gold to which the monetary authorities (or others who are subject to the effective control of the monetary authorities) have title and is held as reserve assets. Gold bullion not held as reserve assets is not a financial asset and is included in non-monetary gold (BPM6, para. 5.74).

Non-monetary gold covers all gold other than monetary gold. Non-monetary gold can be in the form of bullion (that is, gold bullion takes the form of coins, ingots or bars with a purity of at least 995 parts per thousand, including such gold held in allocated gold accounts), gold powder and gold in other unwrought or semimanufactured forms. Jewelry, watches, etc. that contain gold are not included under non-monetary gold but under their respective goods category (see BPM6, para. 10.50).
