Discussion group

Workshop on Statistics of International Trade in Service:
Challenges and Good Practices, Rio de Janeiro, 1 – 4 December 2009

Károly Kovács, Chief, Statistics of Intnl Trade in Services Section

Outline of the presentation

- **Data sources/data collection methods**
- **Data on a detailed level**
- **Use of ITRS and enterprise surveys**
- **Solving problems in data collection**
- **Classifications used**

What data sources/methods are used to measure:

- **Constructions**
- **Financial services**
- **Tourism**

Do you have plans to collect SITS data on a more detailed level, if you have such detailed data please explain what steps have your office done to request/produce them.
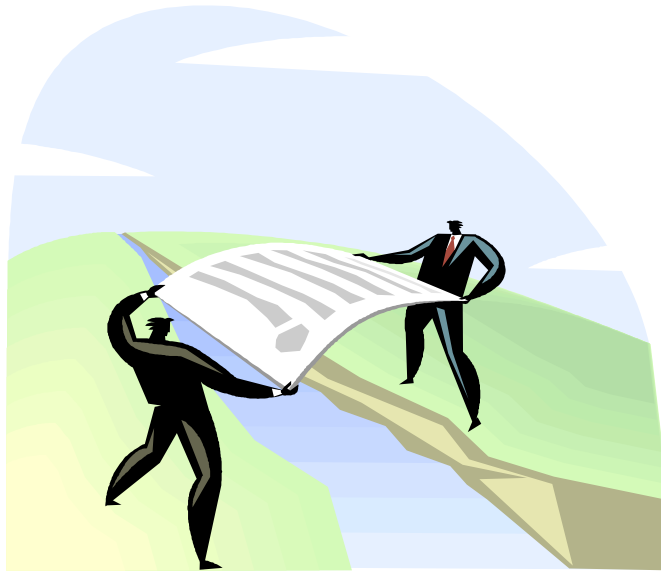

Do you have plans to produce data

• by partner county break-down
• by mode of supply

What are the challenges while using IRTS and enterprise surveys?

How can the problems you face
in the process of data collection be solved?

What are the challenges using the CPC and/or HS classifications.
