The pathway to data interoperability: the importance of data governance standards

The need for interoperability solutions

The centrality of data governance principles

Getting the **governance and institutional framework** right

Designing **data structures** with users in mind

Standardizing the **data content**

Providing standard **interfaces** to access and work with data

Disseminating **linked open data** for knowledge creation

Data governance:

"How decisions are made about data, and how people and processes are expected to behave in relation to data"
