DATA FOR EFFECTIVE PANDEMIC RESPONSE

BY: Selaseh Akaho

Geospatial Data Scientist,

GIS Section, Ghana Statistical Service
COVID 19  Ghana’s Story

In December, 2019
the first cases of COVID-19 reported - China

On 12 March,
Ghana confirmed first two cases

Trend of infection
Imported to Contact within 2 weeks

On 30 March – April, 2020
the partial lock down of Accra and Kumasi.

Data that makes a difference

Data are disaggregated into:

- Age
- Sex
- Education
- Employment
- Location
- Geography
- Disability
- Migration Status
- Wealth quintile
- District level
- Regional level
- National level

DATA SOURCES

- SURVEY
- BIG DATA
- CENSUS

ADMINISTRATIVE
- Ministries, Department and Agencies (MDAs)
- Metropolitan, Municipal and District Assemblies (MMDAs)
- Other Government Institutions
The observation on the dominant places for inter-region mobility engenders the determination of routes for increased surveillance to ensure reduced mobility. Specifically, the high mobility between Greater Accra and Eastern regions suggests the need for an enhanced restricted mobility between the two regions.

Professor Samuel Annim, Government Statistician, Ghana Statistical Service
