

Grant Cameron, Director, Sustainable Development Solutions Network Thematic Research Network on Data and Statistics (SDSN TRenDS)

Grant Cameron has over 35 years of experience working in economics and statistics, most recently at the World Bank where he was Manager of the Advisory Services and Economic Statistics Department. This role involved leading the International Comparison Program, the Bank's work on statistical capacity building, National Accounts, and much more. Grant has also served as an economist and statistician within the Government of Canada.

Francesca Perucci, Assistant Director, Development Data and Outreach Branch, UN Statistics Division

Francesca Perucci oversees the work on global development monitoring, open data, data integration and dissemination, and other global data initiatives.

Francesca initiated her career in the UN as an adviser on gender and social statistics. Since then she has served in different positions within the UN system, where she has been an active leader in developing and promoting the use of data and statistics to inform development policies and review and monitor progress, and has pioneered new ways of producing, analyzing and communicating data to be used effectively for policy and decision making.

She has authored a number of articles on social and gender statistics, the UN publication known as The World's Women in 1995 and 2000, and several statistical manuals on gender statistics and social statistics. She was the lead author of the MDG Report from 2005 to 2012 and currently oversees the preparation of the yearly progress report on the SDGs.

Alberto Zezza, Senior Economist, World Bank Group

Alberto Zezza is with the Development Data Group of the World Bank, where he is the Program Manager of the Center for Development Data (C4D2), based in Rome. He is part of the team that designed and implemented the Survey of national Statistical Offices during COVID-19, and the subsequent Survey of the implementation of Cape Town Global Action Plan. His research interests are in the area of survey methods, agricultural and rural development and food security. He is part of the Living Standards Measurement Study (LSMS) team, where he focuses specifically on improving the availability and quality of agricultural, food and rural data in multi-topic household surveys. Prior to joining the World Bank, he was with the Agricultural Development Economics Division of the Food and Agriculture Organization of the UN (FAO). He holds a Ph.D. in Agricultural and Development Economics from the University of Rome, a M.A. in Development Economics from the University of Sussex, and a degree in Economics from the University of Naples "Federico II".
