Mahsa Hedayati, Information Systems Officer, Office of Information and Communications Technology, United Nations

Mahsa Hedayati is currently conducting research on a Data Strategy for UN Secretariat. To support this work, she is co-creating outreach events to help facilitate multi-disciplinary discussions and solutions in this space. She has worked in various entities across the UN, including in the Department of Field Support, the Department of Peacekeeping Operations, the UN Operations and Crisis Centre, and the Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUCA). She has experience in monitoring and evaluation; political and business analysis; and policy making. She holds a BA in Political Science and an MA in International Affairs.

Emmanuel Letouzé, Director, Data-Pop Alliance

Emmanuel Letouzé is the Director of Data-Pop Alliance, a non-profit "think-and-do" coalition on data, AI and development created in 2013 by the Harvard Humanitarian Initiative (HHI), MIT Media Lab and Overseas Development Institute (ODI), joined by Flowminder in 2016. He is a co-founder and serves as Program Director of the Open Algorithms (OPAL) project and is a Visiting Scholar at MIT Media Lab and a Fellow at MIT Connection Science and HHI. He wrote UN Global Pulse's White Paper "Big Data for Development" in 2011 and has since then focused on the applications and implications of new data and technology for official statistics, governance, poverty and inequality, resilience, as well as ethics and privacy. His work has been featured in media including The Economist, Nature, Le Monde, The Wall Street Journal, Forbes, and the MIT Technology Review. He holds a BA in Political Science and Economics and an MA in Applied Economics-Economic Demography from Sciences Po Paris, an MA in International Affairs-Economic Development from Columbia University, where he was a Fulbright Fellow, and a PhD in Demography from the University of California, Berkeley. He is also a political cartoonist for different media.

Titi Kanti Lestari, Director of Finance, Information Technology and Tourism Statistics, BPS- Statistics Indonesia

Titi Kanti Lestari has been working for BPS-Statistics Indonesia since 1983. She is responsible for managing data collection, processing and analysis of finance, information technology and tourism statistics at BPS-Statistics Indonesia. BPS Statistics Indonesia has been using mobile phone data to capture inbound tourist since 2016. Titi has a PhD from Monash University Australia in Applied Econometrics, and a master's degree in Economic Development from Wollongong University Australia.

Siim Esko, Head of Sales & Marketing, Positium

Siim Esko mainly works with large public sector institutions across Asia, Africa and South America to leverage location data from mobile networks. He used to work for the public think tank Estonian Development Fund as an expert on foresight and emerging economies. Siim has graduate degrees in business from Copenhagen and Vienna. He now leads the business development at Positium.

Positium has been analysing big data from mobile network operators for 10 years. The effect has been use of data-driven insights by all levels of government in Estonia. Positium now builds big data analytics for governments of various countries globally.
