Statement/intervention: Addressing “The fiftieth anniversary of the working group on exonyms of the Netherlands”

This paper is a most impressive account of the already long history of Dutch exonym standardization. It would be interesting to know into which direction Dutch exonym use and exonym standardization has developed in this period: Is it rather inclusive today and recognizing their value as a part of the cultural heritage? And are there substantial divergencies in exonym use inside the Dutch-speaking area?
