5.1. Data from the mobile network operator

The data from mobile network operators includes both MPD data and data on the location of cells throughout the country. In case the cell locations are not provided by the MNOs, open-source data could serve as a substitute data source. For that reason, the description of cell location data, including from MNOs, is covered under section 5.2.

- 5.1.1. Description of mobile phone data (CDR/IPDRs)
- 5.1.2. Assuring quality of mobile phone data
