Acknowledgements

The *International Recommendations for Tourism Statistics 2008 Compilation Guide* was prepared by the Statistics and Tourism Satellite Account Programme of the World Tourism Organization (UNWTO) together with the UNWTO Committee on Statistics and the Tourism Satellite Account. The Guide has benefited strongly from the input provided by experts since 2009, particularly at the Expert Group meeting in Rio de Janeiro in May 2011, and from comments received from the UNWTO online consultation during 2013. This publication also benefited from close collaboration with various international and regional organizations and, in particular, from the contributions of the United Nations Statistics Division (UNSD) and the International Labour Organization (ILO).

UNWTO extends its wholehearted appreciation to UNWTO consultant Marion Libreros who has diligently worked on the publication since its conception, drafting large portions of the text and providing expert guidance throughout its development. Warm thanks also go out to UNWTO consultants Igor Chernyshev and Vladimir Markhonko for their important contribution to the chapters on employment and supplementary issues, respectively, as well as to UNWTO consultant Stan Fleetwood for the thorough editorial review of the text prior to its submission to the Statistical Commission.
