Indicator 5.1.1

Whether or not legal frameworks are in place to promote, enforce and monitor equality and non-discrimination on the basis of sex

**Target 5.1:** End all forms of discrimination against all women and girls everywhere

**Goal 5:** Achieve gender equality and empower all women and girls

**Definition and Rationale**

**Definition:**

This indicator measures government efforts to put in place legal frameworks that promote, enforce and monitor gender equality. The legal frameworks are assessed using a questionnaire comprising 44 binary questions under four areas: overarching legal frameworks and public life; violence against women; employment and economic benefits; marriage and family.

**Concepts:**

The term “legal frameworks” is defined broadly to encompass laws, mechanisms and policies/plans to promote, enforce and monitor gender equality.

**Questionnaire**

**Area 1: Overarching legal frameworks and public life**

**Promote**

1. If customary law is a valid source of law under the constitution, is it invalid if it violates constitutional provisions on equality or nondiscrimination?

2. If personal law is a valid source of law under the constitution, is it invalid if it violates constitutional provisions on equality or nondiscrimination?

3. Is there a discrimination law that prohibits both direct and indirect discrimination against women?

Rationale and Interpretation:

Equality and non-discrimination on the basis of sex are core principles under the international legal and policy framework, including the Convention on the Elimination of All Forms of Discrimination against Women (CEDAW), which has 189 States parties, and the Beijing Platform for Action. This framework sets out the commitments of States to eliminate discrimination against women and promote gender equality, including in the area of legal frameworks.

In the Beijing Platform for Action, States pledged to revoke any remaining laws that discriminate on the basis of sex. The five-year review and appraisal of the Beijing Platform for Action (Beijing + 5) established 2005 as the target date for the repeal of laws that discriminate against women. This deadline has come and gone. While there has been progress in reforming laws to promote gender equality, discrimination against women in the law continues in many countries. Even where legal reforms have taken place, gaps in implementation persist.

Removing discriminatory laws and putting in place legal frameworks that advance gender equality are prerequisites to ending discrimination against women and achieving gender equality (Goal 5, Target 5.1). Indicator 5.1.1 will be crucial in accelerating progress on the implementation of SDG 5 and all other gender-related commitments in the 2030 Agenda for Sustainable Development.

Data Sources and Collection Method

The data for the indicator are derived from an assessment of legal frameworks using primary sources/official government documents, in particular laws, policies/action plans. The assessment is carried out by national counterparts, including National Statistical Offices (NSOs) and/or National Women’s Machinery (NWMs), and legal practitioners/researchers on gender equality, using the questionnaire.

Countries are asked to designate a focal point to undertake the coordination at the country level necessary for the collection and validation of the data. Most designated focal points are within the NWMs, a number are within the NSOs and some are within both the NWMs and the NSOs. After verification, the data with relevant laws, polices and other sources included, are sent to the designated focal points/country counterparts to review and validate. Final answers are arrived at after the process of validation with country counterparts.

Method of Computation and Other Methodological Considerations

Computation Method:

The answers to the questions are coded with simple “Yes/No” answers with “1” for “Yes” and “0” for “No”. For questions 1 and 2 only, they may be scored “N/A” as well as “1” or “0”. In countries where customary or personal law does not apply, these questions are scored as “N/A” and are not included as part of the overall score calculation for the area “overarching legal frameworks and public life”.

The scoring methodology is the unweighted average of the questions under each area of legal frameworks calculated by:

\[ A_i = \frac{q_1 + \cdots + q_{m_i}}{m_i} \]

where \( A_i \) refers the area of legal frameworks \( i \); \( m_i \) refers to the total number of questions under the area of legal frameworks \( i \); and \( q_i = 1 \) if the answer is “Yes” and \( q_i = 0 \) if the answer is “No”.

Results of the four areas are reported as percentages as a dashboard: \( A_1; A_2; A_3; A_4 \). The choice of presenting all four area scores without further aggregation is the result of adopting the posture that high values in one area in a given country need not compensate in any way the country having low values in some other area, and that a comprehensive examination of the value of those four numbers for each country is potentially more informative than trying to summarize all four numbers into a single index.

The score for each area (a number between 0 and 100) represents the percentage of achievement of that country in that area, with 100 being best practice met on all questions in the area.

Comments and limitations:

To avoid duplication, the indicator does not cover areas of legal frameworks that are addressed under indicator 5.a.2, ‘Proportion of countries where the legal framework (including customary law) guarantees women’s equal rights to land ownership and/or control’, and indicator 5.6.2, ‘Number of countries with laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education’. Indicator 5.1.1 complements these other indicators.
