IMF Data Dissemination Standards GDDS/SDDS on Merchandise Trade
The IMF's data dissemination standards are to consist of two tiers: the General Data Dissemination System (GDDS), which would apply to all Fund members, and the more advanced Special Data Dissemination Standard (SDDS), for those member countries having or seeking access to international capital markets. In general, a country is qualified for either GDDS or SDDS. However, for Burundi no information is available at the time of publication of this article.
