UNECE

Short summary:
UNECE is maintaining a knowledge hub on statistics for SDGs (https://w3.unece.org/sdghub/) that includes information on UNECE work and tools, and on country practices. As part of the Knowledge Hub is a dashboard on SDG indicators for countries of the UNECE region (https://w3.unece.org/SDG/en). The dashboard is available in English and Russian, and includes a selection of global SDG indicators based on data availability and relevance for the region, sourced from the global SDG database maintained by UNSD. UNECE also publishes an annual progress assessment on SDG progress in the region based on the UN global SDG indicators database and on the statistical methodology commonly used. See the report for 2022: https://w3.unece.org/sgd2022.

For the second edition of the “Road Map on Statistics for Sustainable Development Goals”, UNECE collected a series of 58 country case studies from contributing National Statistical Offices. Topics covered include the use of SDG statistics, quality assurance, national coordination mechanisms, reporting, tracking progress, leaving no one behind, communication, VNRs, and capacity development. Each case study offers a brief description of the work undertaken by the NSO, the main results and the difficulties encountered. The case studies are intended to highlight best practices and exchange know-how on a range of topics related to SDG statistics with NSOs in similar positions. The case studies are available in English (https://unece.org/statistics/rm-country-case-studies) and include future steps to be undertaken and a link to the work/email address for additional information.

Data source:
Data is sourced form the global SDG indicators database, coming from custodian agencies.

UNECLAC

Short summary:
ECLAC is maintaining the SDG Gateway, the Regional Knowledge Platform on the 2030 Agenda in Latin America and the Caribbean. This is an online portal developed by ECLAC together with United Nations system in the region, where all information related to the SDGs can be found (https://agenda2030lac.org/). The Platforms has a section dedicated to statistical follow-up and monitoring of progress on the 2030 Agenda, including information on institutional aspects, indicator frameworks, databases, statistical profiles, and links to external bodies related to the 2030 Agenda at global, regional and national levels. This section contains, among others, a regional data bank for statistical follow-up to the SDGs in Latin America and the Caribbean (a dashboard), regional SDG statistical profiles by target, regional progress towards SDG targets, reports on progress towards and challenges with the 2030 Agenda at the regional level and SDG-related indicator initiatives and the Statistical Conference of the Americas. You can also find National statistical profiles.

Data source:
The data source for the Official global indicators for the SDGs is the United Nations Global SDG database. Regional proxy and complementary are based on different sources, some of them are calculated by ECLAC and others are produced by international agencies. The national SDG profiles are based on national data sources.

UNESCAP
Short summary:
UN-ESCAP has developed Asia-Pacific SDG Gateway (https://data.unescap.org/) as a platform to access national SDG data, provide regional and subregional assessment of the progress on SDG goals, targets and indicators, as well as technical guidelines for countries to implement ESCAP approach for SDG progress assessment in their countries.

To support national ownership of SDG indicators and enable countries to assess their progress, ESCAP has developed “National SDG Tracker”. The tracker allows countries to complement global SDG indicators with their national indicators (proxies), set their national target values, and visualize progress at goal, target and indicator levels in a few simple steps.

The National SDG Tracker can be accessed on the Asia-Pacific SDG Gateway at https://data.unescap.org/stories/national-sdg-tracker

Data source:
Data source for the Asia-Pacific SDG Gateway is mainly global data collected by custodian agencies, directly sourced from DESA global SDG database. Using the National SDG Tracker, countries are able to customize and update the indicators and data with their national SDG data /indicators before implementing analysis.

UNESCWA

Short summary:
Arab SDG Monitor: A data-driven dynamic and user-friendly SDG dashboard with country and regional visualizations using various functionalities including scorecards, speedometers, coxcombs, and other tracking tools to monitor progress towards SDG targets at country and regional levels based on SDG Global Database. It also includes national reporting platforms with similar functionalities mentioned and based on national data for each of the Arab countries constructed in consultation with the national SDG Teams

Data source:
both from custodian agencies and national data and provides a comparison of both sources

Link(s) toward to any detailed information or materials:
https://arabsdgmmonitor.unescwa.org/

Additional comments, challenges, suggestions:
Tool was requested by the countries to visualize both national and custodian agency data to assess data availability and quality
